PRODUCT INFORMATION

Ready to race Plug and Play Vesaro simulator. The simulator includes everything needed to start racing with custom built Vesaro PC, racing software, display stand and display solution, 5.1 surround sound audio system, force feedback controls with a wireless steering rim and high quality metal 3 pedal setup, Corbeau motor sport bucket racing seat and our world class ultra strong Vesaro I modular rig architecture.

PRODUCT DETAILS

- The simulator comes Plug and Play factory assembled by default and all systems are fully integrated on-board to create a compact and sleek look with simply operation.
- The simulator includes our custom built on-board PC which uses only the best cherry picked components for optimal simulation performance. All Vesaro PC's are built in house by the same technicians building the simulator ensuring that everything seamlessly ties together for a complete unified solution.
- Based on our commercial strength framework with adjustable pedal height and position using a quick release system and featuring adjustable seat position and adjustable height and angle.
- By default the audio is provided by the integrated VR headset headphones which offer an discrete yet immersive audio experience (External audio options available by clicking Customize and selecting the additional audio system)
- The simulator uses our modular architechure allowing full upgradability or change of function from formula to GT or rally style setups should you require.
- The top of the range Pro Controls V-Spec GT Rim is designed for professional use and for customers requiring the highest quality materials and authentic feeling with magnetic carbon shifters and a genuine OMP motorsport wheel rim.
- This is combined with our industry leading professional direct drive force feedback wheel systems which provide industrial grade strength and ultra fast response, accurately recreating the steering forces, road surface texture and tyre feeling through the wheel with incredible levels of realism.
- The Simulator comes with a 2 Year warranty and is backed up by our free remote login support and 7 days per week phone and email support.

POWER INFORMATION

- 2 x Standard 13 amp Household Plug Socket per simulator
- 110v or 220v (Vesaro will provide correct solution based upon the location of your Sim Centre)
- No special industrial or commercial power requirements are needed for this simulator.

INTERNET REQUIREMENTS

- An internet connection is required for online multiplayer racing and to allow Vesaro to provide remote PC login support
- No internet connection is required for offline Solo racing or against the computer controlled AI

CATALOGUE ESSAY

Professional VR solution with the flexibility of a large curved single display which can be utilized as the main display for racing when not using the VR headset, as well as for setup and control. Designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best.

The simulator uses a D-BOX motion physics system with 3 axis full rig movement, pitch, roll and heave, 6 inches of travel create the most realistic interpretation of road cambers, curbs and surface bumps in our range. Four point intelligent tactile feedback provides additional tactile feedback of the road surface, suspension travel, impacts and subtle force effects. This is combined with our G-Force seat belt system providing sustained g-force effects under braking.
